DVD info:

The source for this DVD comes from a low generation VHS-tape, transferred in XP-mode to 4 DVD5's to provide the best possible quality.  
 To prevent the loss of any quality, the show has been edited without re-encoding the video to make it fit on 3 DVD5's.  
 To add more atmosphere the original SBD audio has been equalized and mixed with a nice AUD recording.  
 The original audio stream is also available for the purists.

Two audio tracks from "Roses In The Kansas Rain" from EV2 have been used for the intro- and the credits-video.
