=====

This documentary & concert filmed while the group was touring behind the album "Tusk", was taken from a crudely pressed early American Laserdisc on the "Discovision" label. 2 out of every 3 discs on this label were unplayable. Fortunately, this disc plays properly, and years ago, I transferred it onto DVD, and I got rid of the Laserdisc, hence I don't have any artwork for you. I cloned my DVD on my computer. NTSC. - Philip Cohen
