Here we have a vintage Alice show
from when they were the kings of the
rock world. A number of shows from

the '73 tour appear to have been sound-
board recorded with Dallas and Houston
being the most commonly known
appearing in edited form on the Billion
Dollar Babies Deluxe Edition.

Recorded one month later, the Minneap-
olis show seems a bit looser than those
two but contains the same high level of
energy and fun throughout.

I have edited out the 2 pre-recorded
classical transition pieces "Night On Bald
Mountain" as well as the closing "God
Bless America" recording.

Quality is very good to excellent, there
is a very slight high pitched hum during
"Billion Dollar Babies" and a portion of
"Elected" it then goes away, not really
noticeable unless using headphones and
can easily be adjusted out with a bit of
equalization on playback (I didn't even
really notice it until I used headphones).

Enjoy!
