Venue: Studio 2, Abbey Road, London, England
Date: 5th February 2011
Broadcast: Channel 4, Astra @ 28E, 28th February 2011

Author: kosher
Video Source: DVB-5
Lineage: TM9100 PVR > Ethernet > ProjectX / Womble* > TMPGEnc MPG Editor (m2v + mp2) > IFOEdit**

Transfer Rate: VBR ~2.85 Mbps
Format: 704x576i, 25fps, PAL.
Aspect Ratio: 16:9
Audio: MPEG 1, Layer 2, 48kHz, 192kbps
Menu: No
Chapters: Yes, intuitive, song selection.
Number of discs: 1
Disc Type: DVD5

Tracklist:
01 Intro
02 Four Letter Word
03 The Roller
04 Bring The Light
05 Kill For A Dream

TRT: 0hr 23min 33sec

Notes:
*There were a few errors in the recieved audio which prevented my usual choice of ProjectX from demuxing the audio from the TS file. To overcome this Womble was used to produce an audio file which was acceptable for editing. As the main errors appeared in an advert section it is not a problem.

** The broadcast video stream has a GOP rate of 18 which is not strictly PAL standard. To prevent the video being re-encoded, this disc has been authored using IFOEdit which leaves the GOP rate as is. I have yet to find a machine which won't accept this but if in doubt use a rewriteable first. WE have sometimes had problems with Mac users burning discs with Toast. Toast sometimes reports IFOEdited discs as copy protected. This is not the case. If possible use other, less fussy software
