

PJ Harvey's "Please Leave Quietly" in audio format extracted track by track from the DVD. The interviews and backstage stuff are not here. I used Nero 8 to extract the audio of each LIVE track as a .wav file and then converted them all to FLAC. What you end up with is a KILLER LIVE album from PJ Harvey that can't be bought on CD!

The cool part about it is that the tracks "EVOL" and "Harder" aren't on any PJ Harvey album in studio form but they're here!
