

Ok Lets's try this one again....I am extremely sorry for the problems with the gaps. I decoded my original FLAC files and I had the gaps as well. I had the master on a cdr and copied it to my hard drive (originally) not using EAC. I downloaded EAC and copied the show to my HD via EAC. I converted the new FLAC files back to WAV merged a couple of them together and everything appears to be fine. The other software must have been inserting some sort of data by the track indexes. I have already re-seeded the Ultravox and the Police shows( so if you need them go get 'em! ). I re-did this one exactly the same way so I do not expect any problems. I hate to do things twice, but being a relative newbie I had no idea what to expect ( or do for that matter ). At least I was able to figure it out so future shows will (hopefully) be right from the first upload. Please let me know if there are any problems with these files!

The Jam Captured Live in Boston 1982. According to some comments on the other torrent it was recorded at the Orpheum Theater, 20th of May 1982. I transferred the reel to reel straight to cdr. The lineage would look like this:

PRE-FM Reel>CDR>WAV>CDWAV>mastercdr>wav>FLAC

The reel is a 10"- 7.5 IPS -1/2 track reel. It was transferred on a Tascam BR-20T to a Sony CDR-W33 stand alone professional cd recorder. Transferred to wav and spit via cdwav. The original reel had commercials that have been removed for the torrent that is why the tracks are numbered funny.

# The Jam

## Captured Live In Boston 1982

The Jam Boston 1982

- 1) Radio intro
- 2) Interview with Rick and Bruce
- 3) Circus
