i saw earlier today this fine early suzanne vega show uploaded by my old buddy lilpanda and with the comments that everyone was looking for an improved version, dug out my 2nd gen tape and did a fresh transfer. i think this is quite an improvement over the earlier versions so i'll include samples. here's the other version:

i'm positive it's the same source as all of the copies out there but mine is cleaner with better highs. the others all sound like they've dolbyed to death which probably explains some of the hiss issues. either way, i hope this will satisfy everyone. i tried to make sure the pitch was good so i hope i did a decent job. all info is in the file.
enjoy,
dave
