

Complete set - correct speed and running order.

This is an upgrade over what is posted at: <http://www.dimeadozen.org/torrents-details.php?id=192289>

This copy here is edited together into the correct show running order, as corrected in the comments of the previous seed. Quite a few other minor vinyl clicks were repaired (mostly in Sister Ray) - Sorry but when vinyl is in the lineage, there are always more minor improvements that can be done with the Pro Tools pencil tool... A short dropout in Vicious was also smoothed out. Sorry for the extra bandwidth but it should be worth the extra download to get this great quality recording even better...

The Band

Lou Reed - vocals

Danny Weis - guitar

Prakash John - bass guitar

Penti "Whitey" Glan - drums

Michael Fonfara - keyboards

Other notes: The Swedish state radio company gave Lou and his new live band studio time for rehearsals and then the first show of the tour at the Concerthouse in Stockholm was recorded for FM broadcast for the radioshow "Tonkraft".

I burned this with just the encore on a second disc, but the show can be split elsewhere or left as the full show on a hard disk if desired (the disc transition is seamless).

Sources:

1. Second generation pre-broadcast 1/2 track reel recorded at 7.5 ips speed.
2. Second (or possibly third) generation pre-broadcast 1/4 track reel recorded at 7.5 ips speed.
3. Vinyl bootleg "What Ever Happened To Dick & Steve?".
