#### NOTES:

This is the way superior version of the 1972 WDR radio broadcast recording currently circulating, as, at least to my knowledge, all radio voice overs/announcements are left intact and it's free from the annoying fake stereo processing found on the 'Horrortrip in the paperhouse' (Mind The Magic 029) CD. Although this recording probably miss the "audience interview" (as mentioned on the above website), this is another fantastic show with excellent sound and it includes one of the best versions of 'Spoon' I've heard so far. I was told by the trader who recieved this from a guy in Germany that this is sourced from the original radio broadcast and has never been available on any boots. Anyway, please keep your windows open as usual and ENJOY!
